

# INDEX TO VOLUME 69D

January to December 1965

## A

	Page
Abraham, L. G., Jr., Aspects of the terrestrial ELF noise spectrum when near the source or its antipode.....	977
Adachi, S., Study on the guiding mechanism of whistler radio waves.....	493
—, Y. Mushiaki, Surface waves along a perfectly conducting plane covered with semi-infinite magneto-plasma.....	171
Aiyu, S. V. C., K. N. Lakshminarayan, Atmospheric radio noise burst in the LF band at Bangalore.....	1351
Alasofa, S. G., Attenuation of hydromagnetic waves in the ionosphere.....	361
Alouette I satellite, VLF noise bands observed.....	69
Alteration of the electron density of the lower ionosphere with ground-based transmitters.....	83
Altman, C., Use of the phase-integral method to determine the reflection properties of a stratified ionosphere.....	511
Analysis of linear arrays focused in the Fresnel region.....	989
Analysis of microwave observations of Venus.....	1583
Angels in focus.....	871
Angular dependence of the refractive index in the ionosphere.....	395
Anticn, B. A., Electron density profiles in cylindrical plasmas from microwave refraction data.....	721
Anisotropic electron velocity distribution for the cyclotron absorption of whistlers and VLF emissions.....	1403
Anisotropic media, electrodynamics of moving, the first-order theory.....	401
Anisotropic regions, source-excited, on the use of refractive index diagrams.....	155
Antenna and static magnetic field, an approach to improve re-entry communications by suitable orientations.....	851
Antenna, circular loop, immersed shallowly in a conducting medium.....	1243
Antenna, loop, insulated and loaded, immersed in a conducting medium.....	287
Antenna, plasma covered, electromagnetic properties.....	965
Antenna, small prolate spheroidal, in a dissipative medium.....	1003
Antenna, toroid, small magnetic, imbedded in a highly conducting half-space.....	659
Antennas, an experimental study of plasma sheath effects.....	839
Antennas, biconical, capacitance of, in magneto-ionic media; elliptical cone capacitance.....	291
Antennas, coil, theory.....	997
Antennas, cylindrical, currents, charges, and near fields.....	429
Antennas in anisotropic ionized gases, irreversible power and radiation resistance.....	1313
Appendix to ionospheric cross modulation: a microscopic theory.....	59
Application of planetary measurements to planetary radius and rotation rate.....	1632
Application of pulse compression techniques to ionospheric sounding, a note.....	1191
Approach to improve re-entry, communications by suitable orientations of antenna and static magnetic field.....	851
Arecibo observations of Mars and Jupiter.....	1628
Arecibo observations of Mercury and Venus.....	1627
Aspects of the terrestrial ELF noise spectrum when near the source or its antipode.....	977
Asymmetric profiles, a note concerning the reflection of waves in inhomogeneous layers.....	701
Atlas, D., Angels in focus.....	871
Atmosphere, ionized, and its effect on radar return, electroacoustic waves excited by a space vehicle.....	235
Atmosphere, turbulent, signal degeneration in laser beams propagated.....	629
Atmospheric breakdown limitations to optical maser propagation.....	1431
Atmospheric gravity waves: a new toy for the wave theorist.....	375
Atmospheric radio noise bursts in the LF band at Bangalore.....	1351
Atmospheric variations, response of NBS microwave refractometer cavities.....	1213
Atomic frequency standard, international comparison of, via VLF radio signals.....	905
Attenuation of hydromagnetic waves in the ionosphere.....	361

## B

Bachynski, M. P., Electromagnetic wave penetration of reentry plasma sheaths.....	147
Bahar, E., J. R. Wait, Propagation in a model terrestrial waveguide of nonuniform height theory and experiment.....	1445
Bailey, V. A., Some nonlinear phenomena in the ionosphere.....	9
Balmain, K. G., Impedance of a short dipole in a compressible plasma.....	559
Balanço, B. K., Magneto-ionic propagation in inhomogeneous media. Part I. Transverse propagation.....	1285
—, Magneto-ionic propagation in inhomogeneous media. Part II. Oblique propagation.....	1297
Barber, D., J. F. R. Gower, A report of measurements.....	1563
Bargelotes, P. C., Tyras, J. M. Hamm, R. R. Schell, An experimental study of plasma sheath effects on antennas.....	839
Barrett, A. H., Passive radio observations of Mercury, Venus, Mars, Saturn, and Uranus.....	1563
Barrington, R. E., J. S. Belrose, VLF noise bands observed by the Alouette I satellite.....	69
Bartharion, A. E., B. G. Katuza, On the nature of the cloud layer of Venus (from radiometric observations at microwaves).....	1580
Bates, H. F., Comments on a paper "Measurement of the Phase Velocity of VLF Propagation in the Earth Ionosphere Waveguide" by F. K. Steele and C. J. Chilton.....	1195
Bean, B. R., E. J. Dutton, The biexponential nature of tropospheric gaseous absorption of radio waves.....	885

—, R. O. Gilmer, R. E. McGavin, Response of NBS microwave refractometer cavities to atmospheric variations.....	1213
Becker, W., R. Ruster, J. Klostermeyer, Experimental results on the dynamics of the F region.....	1083
Beckmann, P., Signal degeneration in laser beams propagated through a turbulent atmosphere.....	629
—, W. K. Klempner, Interpretation of the angular dependence of backscattering from the Moon and Venus.....	1669
—, P. Mandics, Test of the constancy of the velocity of electromagnetism.....	623
Belrose, J. S., R. E. Barrington, VLF noise bands observed by the Alouette I satellite.....	69
Berge, G. L., An interferometric study of Jupiter at 10 and 21 cm.....	1552
Berkey, F. T., R. Parthasarathy, Multiple frequency investigations of radio wave absorption during the dawn-breakup phase of auroras.....	415
Berry, L. A., M. E. Chrisman, The path integrals of LF/VLF wave hop theory.....	1469
Bhonsle, R. F., A. F. da Rosa, O. K. Garriot, Measurements of the total electron content and the equivalent slab thickness of the mid-latitude ionosphere.....	929
Biexponential nature of tropospheric gaseous absorption of radio waves.....	885
Bilinear transformation, isometric-circle interpretation and application to VSWR minimization.....	1271
Blair, B. E., A. H. Morgan, Control of WWV and WWVH standard frequency broadcasts by VLF and LF signals.....	915
—, —, E. L. Croc, International comparison of atomic frequency standards via VLF radio signals.....	905
Bollhagen, H., T. D. Carr, S. Gulkis, A. G. Smith, J. May, G. R. Lebo, D. J. Kennedy, Results of recent investigations of Jupiter's decametric radiation.....	1530
Booker, H. G., R. B. Dyer, Dispersion of waves in a cold magnetoplasma from hydro-magnetic to whistler frequencies.....	463
Brice, N., Multiphase periodic very-low-frequency emissions.....	257
Broadcasts by VLF and LF signals, control of WWV and WWVH standard frequency.....	915
Braca, L. A., J. H. Harris, A. T. Villeneuve, Radiation patterns from plasma enclosed cylindrical hypersonic vehicles.....	1335
Budden, K. G., Effect of electron collisions on the formulas of magneto-ionic theory.....	191
Burgess, R. E., Electromagnetic fluctuations in an equilibrium plasma.....	381
Burman, R., A note concerning the reflection of waves in inhomogeneous layers with asymmetric profiles.....	701
—, R. A. Gould, Propagation of vertically polarized electromagnetic waves in a horizontally stratified magnetoplasma.....	693

## C

Calculated curves for groundwave propagation over inhomogeneous earth with pronounced topographical features.....	1011
Calculations of a bistatic scattering cross section of a sphere with an impedance boundary condition.....	299
Caldirola, P., O. De Barvieri, On some nonlinear phenomena in the ionospheric plasma.....	33
Campbell, W. H., E. C. Stiltner, Some characteristics of geomagnetic pulsations pulsation at frequencies near 1 cfs.....	1117
Capacitance of biconical antennas in magneto-ionic media; elliptical cone capacitance.....	291
Caron, P. R., A study of the waves supported by a warm plasma slab.....	729
Carpenter, G. B., A. L. Whitson, Observation of NPG VLF transmission at Tracy, California during path equinox.....	651
Carr, T. D., S. Gulkis, A. G. Smith, J. May, G. R. Lebo, D. J. Kennedy, H. Bollhagen, Results of recent investigations of Jupiter's decametric radiation.....	1530
Chen, K. M., Discussion on basic equations with source terms in compressive and incompressive plasmas.....	243
—, Electroacoustic waves excited by a space vehicle in ionized atmosphere and its effect on radar return.....	235
—, Reactive loading of arbitrarily illuminated cylinders to minimize microwave backscatter.....	1481
Cheng, D. K., J. C. Rudolph, Isometric-circle interpretation of bilinear transformation and its application to VSWR minimization.....	1271
Chia, R. C., A. K. Fong, R. K. Moore, High frequency backscatter from the earth measured at 100 km altitude.....	641
Chilton, C. J., F. K. Steele, Reply to H. F. Bates' Comments on "Measurement of the Phase Velocity of VLF Propagation in the Earth Ionosphere Waveguide" by F. K. Steele and C. J. Chilton.....	1196
Chrisman, M. E., L. A. Berry, The path integrals of LF/VLF wave hop theory.....	1469
Circular loop antenna immersed shallowly in a conducting medium.....	1243
Clapp, R. E., Interference rejection capability of a switched radiometer.....	1425
Cloud layer of Venus, nature of (from radiometric observations at microwaves).....	1580
—, Y. Yeh, Index of refraction surfaces for plasma waves.....	539
Cole, R. K., Jr., The Schumann resonances.....	1345
Coll, D. C., J. R. Storey, A note on the application of pulse compression techniques to ionospheric sounding.....	1191

	Page
-, Some preliminary Venus radar results.....	1623
Gordon, M. A., J. W. Warwick, Frequency and polarization structure of Jupiter's decametric emission on a 10-millisecond scale.....	1537
Gould, R. N., R. Burman, Propagation of vertically polarized electromagnetic waves in a horizontally stratified magnetoplasma.....	693
Cower, J. F. R., D. Barber, A report on measurements.....	1563
Gross, S. H., L. B. Felsen, Propagation in nonuniform gyrotropic media.....	333
Ground-based passive probing using the microwave spectrum of oxygen.....	1201
Groundwave propagation over inhomogeneous earth, calculated curves for, with pronounced topographical features.....	1011
Groundwaves, model experiments on propagation of, across an abrupt boundary at perpendicular incidence.....	1375
Group velocity of 17.8 kcls VLF radio waves, measurement.....	1235
Gulkis, S., T. D. Carr, A. G. Smith, J. May, G. R. Lebo, D. J. Kennedy, H. Bollhagen, Results of recent investigations of Jupiter's decametric radiation.....	1530
Guthart, H., An anisotropic electron velocity distribution for the cyclotron absorption of whistlers and VLF emission.....	1403
-, Nose whistler dispersion as a measure of magnetosphere electron temperature.....	1417
Gyro interaction in the ionosphere, at oblique incidence, an experimental study.....	25
Gyrotropic bodies, geometrical optics.....	349
Gyrotropic cylinders with axial magnetic fields, electromagnetic scattering.....	227
Gyrotropic media, nonuniform, propagation.....	333

## H

Hagfors, T., J. Moriello, The effect of roughness on the polarization of thermal emission from a surface.....	1614
Hamm, J. M., G. Tyra, P. C. Borgeolotes, R. R. Schell, An experimental study of plasma sheath effects on antennas.....	839
Hardebeck, H. E., Mars and Venus at 70-wavelength.....	1573
Hargreaves, J. K., G. M. Lerfeld, J. M. Watts, D-region absorption at 10 and 15 Mc/s during the total solar eclipse of July 20, 1963.....	939
Harris, J. H., A. T. Villeneuve, L. A. Broca, Radiation patterns from plasma enclosed cylindrical hypersonic vehicles.....	1335
Hay, D. R., K. Naito, An investigation of clear air stratification with radar and elevated instruments.....	877
Heister, E. H., Experimental studies of perturbations in ionospheric plasma.....	219
Hibberd, F. H., An experimental study of gyro interaction in the ionosphere, at oblique incidence.....	25
Higgins, C. S., O. B. Slee, Results from CSIRO, Sydney, Australia.....	641
High frequency backscatter from the earth measured at 1000 km altitude.....	641
Hines, C. O., Atmospheric gravity waves: a new toy for the wave theorist.....	375
Hirsch, P., E-mode propagation in a plane-stratified plasma.....	521
Hiss, P. F. and VLF, in polar regions.....	1239
Horizontally stratified magnetoplasma, propagation of vertically polarized electromagnetic waves.....	693
Huges, C. J., Ionospheric cross modulation, a microscopic theory (appendix).....	59
Hunsucker, K. D., Radio studies of the high-latitude ionosphere during the solar eclipse of 20 July 1963.....	267
Hutton, R., Equatorial effects.....	1169
Hydromagnetic wave in an inhomogeneous, cylindrical plasma.....	389
Hydromagnetic waves in the ionosphere, attenuation.....	361
Hydromagnetic-wave theory, collision effects.....	95
Hydrometers, polydispersed, in the $\lambda$ 0.1 to $\lambda$ 10 cm range, complete scattering.....	893

## I

Iizuka, K., An experimental study on the circular loop antenna immersed shallowly in a conducting medium.....	1243
Impedance of a short dipole in a compressible plasma.....	559
Index of refraction surfaces for plasma waves.....	539
Inferring the refractive index-structure of the troposphere from electromagnetic scattering experiments.....	881
Influence of an inhomogeneous ground on the propagation of VLF radio waves in the earth-ionosphere waveguide.....	969
Influence of finite ground conductivity on the propagation of VLF waves.....	1359
Inhomogeneous layers with asymmetric profiles, a note concerning the reflection of waves.....	701
Inhomogeneous media, magneto-ionic propagation. Part I. Transverse propagation.....	1285
Inhomogeneous media, magneto-ionic propagation. Part II. Oblique propagation.....	1297
Insulated and loaded loop antenna immersed in a conducting medium.....	287
Interference rejection capability of a switched radiometer.....	1425
Interferometric study of Jupiter at 10 and 21 cm.....	1552
International comparison of atomic frequency standards via VLF radio signals.....	905
Interpretation of early magnetic transients caused by high-altitude nuclear detonations.....	1179
Interpretation of the angular dependence of backscattering from the Moon and Venus.....	1669
Investigation of clear air stratification with radar and elevated instruments.....	877
Investigation of the surfaces of the Moon and planets by the thermal radiation.....	1585
Ionosphere, angular dependence of the refractive index.....	395
Ionosphere, at oblique incidence, an experimental study of gyro interaction.....	25
Ionosphere, attenuation of hydromagnetic waves.....	361
Ionosphere, high-latitude, radio studies of, during the solar eclipse.....	267
Ionosphere, lower, with ground-based transmitters, alteration of the electron density.....	83
Ionosphere, midlatitude, measurements of the total electron content and the equivalent slab thickness.....	929
Ionosphere, nonlinear phenomena.....	9
Ionosphere, phase velocities and attenuation distances.....	819
Ionosphere, stratified, use of the phase integral method to determine the reflection properties.....	511
Ionospheres, spherically stratified, analytical formulas for radio paths.....	453
Ionospheric cross modulation: a microscopic theory.....	59
Ionospheric effects of electrostatic fields generated in the outer magnetosphere.....	827
Ionospheric nonlinearities, some problems.....	1

Ionospheric perturbation (the roles played by the ionosphere in geomagnetic pulsations).....	1149
Ionospheric plasma, experimental studies of perturbations.....	219
Ionospheric plasma, on some nonlinear phenomena.....	33
Ionospheric sounding, a note on the application of pulse compression techniques.....	1191
Irreversible power and radiation resistance of antennas in anisotropic ionized gases.....	1313
Isometric-circle interpretation of bilinear transformation and its application to VSWR minimization.....	1271

## J

Jacavanco, D. J., Electromagnetic properties of a plasma covered antenna.....	965
Jackson, C. M., J. R. Wait, Calculations of the bistatic scattering cross section of a sphere with an impedance boundary condition.....	299
Johnson, W. C., T. Loaspre, J. F. Walkup, Study of the phenomenon of whistler echoes.....	407
Jørgensen, T. S., On the radio noise level at low and very low frequencies in polar regions.....	1239
Joss, J. W., J. R. Davis, D. C. Rohlf, G. A. Skoggs, Decimeter-wave radar studies of the lunar surface.....	1659
Jupiter, an interferometric study of, at 10 and 21 cm.....	1552
Jupiter, as observed at short radio wavelengths.....	1560
Jupiter, observations of, at 8.6 mm.....	1560
Jupiter, simultaneous observations of, on three frequencies.....	1561
Jupiter, the decametric radio emissions.....	1513
Jupiter's decametric emission, frequency and polarization structure of, on a 10-millisecond scale.....	1537
Jupiter's decametric radiation, results of recent investigations.....	1530
Jupiter's decimeter radiation, dependence of, on electron distribution in its Van Allen belts.....	1557

## K

Kahalas, S. L., Interpretation of early magnetic transients caused by high-altitude nuclear detonations.....	1179
Kazes, I., Simultaneous observation of Jupiter on three frequencies.....	1561
Kellermann, K. I., Radio observations of Mercury, Venus, Mars, Saturn, and Uranus.....	1574
Kelly, R. D., R. H. Williams, W. T. Cowan, Small prolate spheroidal antenna in a dissipative medium.....	1003
Kennedy, D. J., T. D. Carr, S. Gulkis, A. G. Smith, J. May, G. R. Lebo, H. Bollhagen, Results of recent investigations of Jupiter's decametric radiation.....	1530
Kinetic theory of plasmas, transmission and reflection of electromagnetic waves.....	735
King, R. J., S. W. Miley, Model experiments on propagation of groundwaves across an abrupt boundary at perpendicular incidence.....	1375
King, R. W., P. T. Wu, Currents, charges, and near fields of cylindrical antennas.....	429
Klemperer, W. K., P. Beckmann, Interpretation of the angular dependence of backscattering from the Moon and Venus.....	1669
Klostermeyer, J., W. Becker, R. Rüster, Experimental results on the dynamics of the F region.....	1083
Knop, C. M., C. T. Swift, A note on the radiation of conductance of an axial slot on a cylinder.....	447
Kotelnikov, V. A., Radar observations of Venus in the Soviet Union in 1964.....	1634
Kraichman, M. B., Sleric excitation of a two-layer conducting medium.....	423
Kutzu, B. G., A. E. Basharinov, On the nature of the cloud layer of Venus (from radiometric observations at microwaves).....	1580

## L

Loaspre, T., W. C. Johnson, J. F. Walkup, Study of the phenomenon of whistler echoes.....	407
Lakshminarayan, K. N., S. F. C. Aiy, Atmospheric radio noise bursts in the LF band at Bangalore.....	1351
Laser beams propagated through a turbulent atmosphere, signal degeneration.....	629
Laser, Moon distance measurement.....	1681
Latitudes, middle and low, regular oscillations near 1 c/s, observed.....	1069
Layers, inhomogeneous, with asymmetric profiles, a note concerning the reflection of waves.....	701
Layzer, D., D. H. Menzel, Ionospheric cross modulation: a microscopic theory.....	59
Leadabrand, R. L., A comparison of radar auroral reflection data with acoustic wave theory.....	959
Leaky waves supported by a warm plasma slab.....	729
Leavens, W. M., Scattering resonances of a cylindrical plasma.....	1321
Lebo, G. R., T. D. Carr, S. Gulkis, A. G. Smith, J. May, D. J. Kennedy, H. Bollhagen, Results of recent investigations of Jupiter's decametric radiation.....	1530
Lee, K. S., C. H. Popas, Irreversible power and radiation resistance of antennas in anisotropic ionized gases.....	1313
Lee, W. C. Y., L. Peters, Jr., C. H. Walter, Electromagnetic scattering by gyrotropic cylinders with axial magnetic fields.....	227
-, Geometrical optics for gyrotropic bodies.....	349
Lenhart, D. H., A. Etzén, J. A. Doran, Concept of differential reflectivity as applied to the reflection of beam-limited radiation by a convex body.....	317
Lerfeld, G. M., J. K. Hargreaves, J. M. Watts, D-region absorption at 10 and 15 Mc/s during the total solar eclipse of July 20, 1963.....	939
Lerner, R. M., J. Max, VLF and LF fields propagating near and into a rough sea.....	273
LF and VLF fields propagating near and into a rough sea.....	273
LF band at Bangalore, atmospheric radio noise bursts.....	1351
LF/VLF wave hop theory, path integrals.....	1469
Lienohn, H. B., Radiation from electrons in a magnetoplasma.....	741
Linear polarization of lunar emission.....	1613
Lombardini, P. P., Alteration of the electron density of the lower ionosphere with ground-based transmitters.....	83
-, R. Desiak, J. Goldfarb, Analysis of linear arrays focused in the Fresnel region.....	989
Lunar emission, linear polarization.....	1613

Lunar mapping by coherent-pulse analysis.....	1667
Lunar radio brightness distribution and certain properties of its surface layer measurements.....	1616
Lunar surface, decimeter-wave radar results.....	1659

## M

Ma, M. T., Directivity of uniformly spaced optimum endfire arrays with equal sidelobes.....	1249
Magnetic fields, axial, electromagnetic scattering by gyrotropic cylinders.....	227
Magneto-ionic media, capacitance of biconical antennas; elliptical cone capacitance.....	291
Magneto-ionic medium, electromagnetic waves along an infinitely long and thin conducting wire.....	503
Magneto-ionic medium, lossless, electromagnetic radiation from a magnetic dipole with arbitrary orientation embedded.....	671
Magneto-ionic medium, oscillating, collision-free, electromagnetic wave reflection.....	111
Magneto-ionic propagation in inhomogeneous media. Part I. Transverse propagation.....	1285
Magneto-ionic propagation in inhomogeneous media. Part II. Oblique propagation.....	1297
Magneto-ionic theory, effect of electron collisions on the formulas.....	191
Magnetoplasma, cold, dispersion of waves in, from hydromagnetic to whistler frequencies.....	463
Magnetoplasma, horizontally stratified, propagation of vertically polarized electromagnetic waves.....	693
Magnetoplasma, radiation from electrons.....	741
Magnetoplasma, semi-infinite, surface waves along a perfectly conducting plane.....	807
Magnetoplasma-vacuum boundary, propagation of waves across.....	617
Magnetoplasmas, oxygen, wave interaction.....	1417
Magnetosphere electron temperature, a measure of, nose whistler dispersion.....	1417
Magnetosphere, outer, ionospheric effects of electrostatic fields generated.....	827
Magnetosphere, propagation of hydromagnetic waves.....	1133
Magnetosphere, solar wind and its interaction.....	1033
Maley, S. W., R. J. King, Model experiments on propagation of groundwaves across an abrupt boundary at perpendicular incidence.....	1383
Mandics, P., P. Beckmann, Test of the constancy of the velocity of electromagneticism.....	623
Maps at 3 mm with 3-minute-of-arc resolution.....	1613
Mars and Jupiter, recent observations.....	1628
Mars and Venus at 70-cm wavelength.....	1573
Mars, observation of, at 12.5-cm wavelength.....	1580
Mars radar results, preliminary.....	1625
Martian surface, radio evidence on the structure and composition.....	1629
Maser propagation, optical, atmospheric breakdown limitations.....	1431
Matsumura, S., Ionospheric perturbation the roles played by the ionosphere in geomagnetic pulsations.....	1149
Maz, J., R. M. Lerner, VLF and LF fields propagating near and into a rough sea.....	273
May, J., T. D. Carr, S. Gulkis, A. G. Smith, G. R. Lebo, D. J. Kennedy, H. Bollhagen, Results of recent investigations of Jupiter's decametric radiation.....	1530
McGavin, R. E., R. O. Gilmer, B. R. Bean, Response of NBS microwave refractometer cavities to atmospheric variations.....	1213
McLane, C. K., T. Tsukishima, Hydromagnetic wave in an inhomogeneous, cylindrical plasma.....	839
Measurement of group velocity of 17.8 kc/s VLF radio waves.....	1235
Measurements of lunar radio brightness distribution and certain properties of its surface layer.....	1616
Measurements of the total electron content and the equivalent slab thickness of the midlatitude ionosphere.....	929
Megill, L. R., Excitation of optical radiation by high power density radio beams.....	77
—, Self distortion of radio signals in the D region.....	367
Mentoni, M. H., Momentum transfer collisions in oxygen for thermal electrons.....	213
Menzel, D. H., Some problems of ionospheric nonlinearities.....	1
—, D. Layer, ionospheric cross modulation: a microscopic theory.....	59
Mezger, P. G., Polarization of thermal radiation of the Moon at 14.5 Gs/s.....	1612
Microplasma experiment at conjugate points, preliminary results.....	1107
Microscopic theory: ionospheric cross modulation.....	59
Microwave, backscatter, reactive loading of arbitrarily illuminated cylinders to minimize.....	1481
Microwave beam entering a linearly graded plasma, on the point of emergence.....	177
Microwave observations of Venus, an analysis.....	1583
Microwave refractometer cavities, response to atmospheric variations.....	1213
Microwave spectrum of oxygen, ground-based passive probing.....	1201
Mitra, R., G. L. Duff, A systematic study of the radiation patterns of a dipole in a magnetoplasma based on a classification of the associated dispersion surfaces.....	681
Model experiments on propagation of groundwaves across an abrupt boundary at perpendicular incidence.....	1375
Momentum transfer collisions in oxygen for thermal electrons.....	213
Moon and planets, investigation of the surfaces of, by the thermal radiation.....	1585
Moon distance measurement by laser.....	1681
Moon, radar studies.....	1637
Moore, R. K., R. C. Chia, A. K. Fung, High frequency backscatter from the earth measured at 1000 km altitude.....	641
Morgan, A. H., B. E. Blair, Control of WWV and WWVH standard frequency broadcasts by VLF and LF signals.....	915
—, E. L. Cron, B. E. Blair, International comparison of atomic frequency standards via VLF radio signals.....	905
Moriello, J. T., Hagfors, The effect of roughness on the polarization of thermal emission from a surface.....	1614
Motz, H., On electromagnetic radiation from a magnetic dipole with arbitrary orientation embedded in a lossless magneto-ionic medium.....	671
Muhleman, D. O., Observations of Mars at 12.5-cm wavelength.....	1580
—, Radar scattering from Venus at 12.5 cm.....	1630
Multiphase periodic very-low-frequency emissions.....	257
Multiple frequency investigations of radio wave absorption during the dawn-breakup phase of auroras.....	415

Mushiake, Y., Electromagnetic waves along an infinitely long and thin conducting wire in a magneto-ionic medium.....	503
—, S. Adachi, Surface waves along a perfectly conducting plane covered with semi-infinite magneto-plasma.....	171

## N

Naito, K., D. R. Hay, An investigation of clear air stratification with radar and elevated instruments.....	877
Narsinga Rao, K. V., Wave interaction in oxygen magnetoplasmas.....	617
Natural ELF electromagnetic phenomena.....	1071
Nonlinear phenomena in the ionosphere.....	9
Nonlinear propagation of electromagnetic waves in magnetoplasmas. II.....	139
Nose whistler dispersion as a measure of magnetosphere electron temperature.....	1417
Note on the radiation conductance of an axial slot on a cylinder.....	447
Nuclear detonations, interpretations of early magnetic transients caused by high-altitude.....	1179

## O

Oblique magneto-ionic propagation in inhomogeneous media.....	1297
Observations of Mars at 12.5-cm wavelength.....	1580
Observation of NPG VLF transmissions at Tracy, California during path equinox.....	651
Observations of Jupiter at 8.6 mm.....	1560
Observations of radio emission from the planets Mercury, Mars, and Saturn at wavelength of 8 mm.....	1576
Observations of the 1.35-cm water-vapor line.....	1580
On the nature of the cloud layer of Venus from radiometric observations at microwave.....	1580
On the point of emergence of a microwave entering a linearly graded plasma.....	177
On the radio noise level at low and very low frequencies in polar regions.....	1239
Optical maser propagation, atmospheric breakdown limitations.....	1431
Optical radiation, excitation of, by high power density radio beams.....	77
Optics, geometrical, for gyrotropic bodies.....	349
Orszag, A., Moon distance measurement by laser.....	1681
Outgassing, rocket, effects on RF experiments.....	1219
Oxygen magnetoplasmas, wave interaction.....	617
Oxygen, microwave spectrum, ground-based passive probing.....	1201
Oxygen plasma (discharge), momentum collisions in, for thermal electrons.....	213

## P

Padhi, T., Theory of coil antennas.....	997
Palumbo, C. J., M. S. Sodha, Nonlinear propagation of electromagnetic waves in magnetoplasmas. II.....	139
Papas, C. H., K. S. H. Lee, Irreversible power and radiation resistance of antennas in anisotropic ionized gases.....	1313
Parameters of polydispersed hydrometers in the $\lambda$ 0.1 to $\lambda$ 10 cm range, complete scattering.....	983
Parthasarathy, R., F. T. Berkey, Multiple frequency investigations of radio wave absorption during the dawn-breakup phase of auroras.....	415
Passive radar observations of Mercury, Venus, Mars, Saturn and Uranus.....	1563
Path integrals of LFN/VLF wave hop theory.....	1257
Penumbra region, extension of Fock theory for currents.....	231
Peters, L. Jr., Radar cross sections of plasma bodies at the plasma frequency.....	231
—, W. C. Y. Lee, C. H. Walters, Electromagnetic scattering by gyrotropic cylinders with axial magnetic fields.....	227
—, —, —, Geometrical optics for gyrotropic bodies.....	349
